
Innovation for the Next Chapter in Nuclear Energy

Dominion Engineering, Inc.

Lunch & Learn

MEET THE COMPANY | OCT. 18TH | 12PM | PAHB132

Chuck Marks, Ph.D., P.E., Director of Chemical and Materials

Dr. Marks will be presenting an introduction to Dominion Engineering, Inc. (DEI) and showcasing several notable chemical engineering projects he has led during his time at the company. His insights will offer a deeper look into the innovative work shaping the future of the industry.

DEI, a specialized engineering firm based in Reston, VA, is dedicated to supporting the nuclear power industry. Our expertise encompasses laboratory research, hardware design, and consulting, with a primary focus on maintaining critical equipment such as fuel rod assemblies, steam generators, and filtration devices. As part of Allied Power, DEI benefits from the backing of a larger organization while retaining the agility of a close-knit group of 60. Our staff brings deep technical expertise in nuclear engineering services, including thermal performance analysis, material characterization, chemical process development, radiation protection, and stress analysis.
