

WHAT IS RESEARCH? HOW DO I GET STARTED?

Getting involved in scientific research is a core component of learning how to become a scientist, but understanding research and how to get started can be daunting. Where should you begin to get involved in undergraduate research?

Join us for an informative workshop designed to clarify the steps to get involved in research. You'll learn practical strategies to kick-start your research journey, including how to find resources and connect with mentors. Additionally, you'll have the opportunity to engage with undergraduate students who are currently involved in research across various STEM disciplines.

WORKSHOP HOST

Dr. Maria Cambraia
Director, Research and
International Affairs
College of Natural and
Mathematical Sciences

Key Discussions & Insights

- ✓ Learn the essential steps involved in scientific research
- ✓ Engage with current undergraduate researchers
- ✓ Explore ways to find research mentors and gain research experience

LOCATION
University Center
115

October 1, 2025 @ 12 PM
