IMDA Graduate Students, Alumni and UMBC's Visual Arts community are invited to this IMDA Alumni event at CAA. We'll offer light refreshments while getting a chance to catch up with old friends, meet like-minded artists across two generations and share news with future colleagues.

Meet our special guests, Algorithmic Pollution Panelists: Tiffany Holmes (IMDA Alumna 1997), David Rokeby, Ingrid Bachmann, Dan Dal Bo and Jason Hoelscher.

The Intermedia + Digital Arts MFA at UMBC recently changed it's name [from Imaging and Digital Arts] in order to manifest the diverse and continuously emerging ideas by our graduate students, especially at the service of art and technology. 2016 also reflects the 20th year the Department of Visual Arts has offered the M.F.A. and this event will be the first of several alumni initiatives designed to reflect on our maturing program.
