

Undergraduate Research Opportunity for the 2020-2021 Academic Year

Looking for two UMBC undergraduate students to work on a year-long project to understand the the spread of HIV within the host. Each student will receive a \$3000 stipend.

Requirements: Students must have taken Math 225 and have some programming experience. Due to funding constraints, students must be U.S. Citizens or permanent residents. Students must be prepared to commit 10 hours per week to the project.

Application: Please email Dr. Kathleen Hoffman (khoffman@umbc.edu) an unofficial transcript and one paragraph describing why you would like to do undergraduate research on HIV dynamics. Applications received by March 13, 2020 will receive full consideration.
